

## **Job Title: GIS/CADD Technician**

### **Kennesaw, GA**

**THE COMPANY: MC Squared, Inc.** is a regional professional consulting firm specializing in the fields of Geotechnical engineering, Geo-Environmental Construction Materials Testing and Inspection and Pavement Management with offices in Florida, Georgia and South Carolina. Our clients are comprised of DOT s, municipalities, state agencies and large multi-national engineering firms. We are retained to provide complex and innovative engineering solutions to support the design of water and wastewater treatment plants, roadways, bridges, airports, tunnels and conveyance systems. (Additionally, we provide innovative and cost-effective solutions for structures, commercial developments and educational systems.) MC Squared has created an environment of subject matter experts (SME) and seasoned professionals with national and international experience as well as PhD-level engineers. Our team provides a healthy environment for career advancement in technical, managerial and business development areas with an exceptional commitment to engineering excellence and client service.

#### **Job Description:**

We are looking for an experienced GIS/CADD technician to add to our successful team. This GIS/CADD Technician will be led by Project Managers on a team consisting of multi-discipline design engineers focused on the production of design phase deliverables including reports, design manuals, plans and profiles, sections, details and specifications. The CADD technician must work well in a team environment, be proficient in AutoCAD/GIS and have strong communication skills.

#### **Qualifications and Skills:**

- Proficient in AutoCAD to design 2D figures and diagrams to be used as deliverables in project reports. Common figures and diagrams include project location maps, cross-sections, proposed construction plans and soil profile fences. However, project specific requests are to be expected
- Manage prioritization of activities to meet multiple project timeline requirements
- Coordination with Project Engineers and Field Personnel
- Project organization is a must
- Self-check deliverables to avoid unnecessary revisions
- Identify opportunities of improvement in design or workflow
- Keep deliverables consistent from project to project
- Willingness to learn gINT (basic data entry geotechnical software)
- Working knowledge of Microsoft Excel, Adobe Acrobat Reader, Google Earth Pro
- The ability to incorporate ArcGIS would be a plus
- Knowledge of Micro-station would be a plus
