

Job Title: Geotechnical Project Manager(Multiple Positions)

Kennesaw, GA

THE COMPANY: MC Squared, Inc. is a regional professional consulting firm specializing in the fields of Geotechnical engineering, Geo-Environmental Construction Materials Testing and Inspection and Pavement Management with offices in Florida, Georgia and South Carolina. Our clients are comprised of DOT s, municipalities, state agencies and large multi-national engineering firms. We are retained to provide complex and innovative engineering solutions to support the design of water and wastewater treatment plants, roadways, bridges, airports, tunnels and conveyance systems. (Additionally, we provide innovative and cost-effective solutions for structures, commercial developments and educational systems.) MC Squared has created an environment of subject matter experts (SME) and seasoned professionals with national and international experience as well as PhD-level engineers. Our team provides a healthy environment for career advancement in technical, managerial and business development areas with an exceptional commitment to engineering excellence and client service.

Job Description:

The successful Geotechnical Project Manager will complement our existing successful engineering team and assist in managing existing projects. The ideal candidate must have at least 10+ years of experience in geotechnical engineering and construction materials testing consulting environment, and the ability to provide technical support on geotechnical and construction projects. This position requires technical competence and a positive attitude and an ability to communicate effectively with clients, other engineers and junior staff. Experience with project management is required. Strong analytical and computer skills are highly desirable in areas including slope stability analysis, retaining wall analysis, bearing capacity analysis, settlement analysis, pile design, and foundation design. A Master's degree from an accredited college/university is highly desirable with a major in civil/geotechnical engineering. Professional Registration (PE) in the State of Georgia & Florida is a must with the ability to obtain registration in other requested states within 6 months. Advanced knowledge of MS Office, including Word, Excel and PowerPoint and other engineering related software is required. Excellent communication skills and strong business acumen are required for success and advancements. You will have the opportunity to grow your career while keeping current with the latest technological innovations. The successful candidate will work out of the Kennesaw (Atlanta) office.

Qualifications and Skills:

- BS degree (MS degree or PhD is preferred) in Civil Engineering with concentration in Geotechnical Engineering or construction materials testing
- High preference will be afforded to candidates with MS or PhD degree with a good GPA
- Strong oral and written communication skills; experience preparing reports that demonstrate technical knowledge
- Demonstrated performance of independent analysis and demonstrated strong problem-solving and organizational skills.
- Strong personal safety awareness
